Control Systems Lead – Coppell, TX

Job Location

United States
Remote work from: USA

Base Salary

USD 40 - USD 50

Employment Type

Full-time, Part-time

Description

Our Reliability & Maintenance Engineering (RME) team is integral to the success of Amazon worldwide. They manage risks, minimize system downtime, and find innovative ways to improve the way we work. It's how we'll become a more sustainable business while building the future one innovative product, service, and idea at a time.

If you do not meet 100% of the preferred qualifications outlined in this job description, we still encourage you to apply. We understand that skills and competencies can be gained in many ways and we are primarily interested in a demonstrated commitment to the work and the potential to grow. Experience comes in many forms and passion goes a long way. If your experience is close to what we're looking for, please consider applying.

About The Role

As a Control Systems Lead, you will lead service technicians on the team with maintaining, troubleshooting, and modifying Material Handling (MHE) controls systems equipment to ensure operational performance. You will support the Operations Maintenance team by designing solutions for difficult problems and managing projects. You will help train, and mentor service technicians and contract technicians.

What Do We Offer?

Amazon offers competitive compensation packages including comprehensive healthcare benefits starting on Day 1, matching 401(k) program, and up to 20 weeks of paid parental leave. But wait, there's more: we don't wear suits and ties! Come as you are because jeans, t-shirts, sneakers and sometimes a neon safety vest will be your daily outfit.
