Product Manager III – Walmart Data Ventures

Job Location

United States
Remote work from: USA

Base Salary

USD 40 - USD 50

Employment Type

Full-time, Part-time

Description

What you'll do...

Join the Revolution in Data with Walmart Data Ventures as a Product Manager!

Are you an entrepreneurial spirit with a knack for product management? Do you thrive on the challenge of transforming raw data into actionable insights? If so, we want YOU to join our team at Walmart Data Ventures. Formed in 2021, our mission is to harness the power of Walmart's data, developing B2B data initiatives that offer merchants and suppliers an unrivaled view of omni-shoppers. We're on the lookout for a dynamic Product Manager to drive this transformation from concept to deployment.

What you'll do...

- Execute the strategy and roadmap to address customer needs
- Collaborate with cross-functional teams for seamless product development and delivery
- Serve as the go-to-expert for product offerings, evangelizing our value proposition
- Use insights from data to inform product improvements
- Assess product performance metrics, identifying trends and insights and implement improvements based on data-driven decisions
- Fortify your connection with your customers to understand their needs to inform the roadmap. Map these opportunities in user stories, flow diagrams, and wireframes.
- Organizing the sprints, prioritizing the product backlog, and providing clarity around requirements to the product development group
- Regularly communicate your product development progress to the rest of the organization
- Define and document functional and non-functional requirements, track prioritization and own timely delivery of products/features through partnership with Engineering, Design and Data stewardship teams
- Coordinate and participate in user acceptance testing of functional requirements
