Program Manager – Cybersecurity Enablement

Job Location

United States
Remote work from: USA

Base Salary

USD 40 - USD 50

Employment Type

Full-time, Part-time

Description

Who we are lululemon is an innovative performance apparel company for yoga, running, training, and other athletic pursuits. Setting the bar in technical fabrics and functional design, we create transformational products and experiences that support people in moving, growing, connecting, and being well. We owe our success to our innovative product, emphasis on stores, commitment to our people, and the incredible connections we make in every community we're in.

As a company, we focus on creating positive change to build a healthier, thriving future. In particular, that includes creating an equitable, inclusive and growth-focused environment for our people. About this team The lululemon Cybersecurity team enables lululemon to conduct its global operations in a secure manner and safeguard the trusted information of its guests and educators.

This is accomplished by understanding risks, developing mitigation plans and continuously maturing capabilities & services. To further enhance our team, we are looking for a Program Manager – Cybersecurity Cyber Enablement Services, with demonstrated expertise in program management, product management and people enablement. A day in the life: The Program Manager is responsible for the overall delivery of either a group of related projects, 1-2 programs across 3+ functions within lululemon, or 3+ well established and mature scrum/operational teams.

The Program Manager oversees the Project Managers, Analysts, and Engineers responsible for tactical delivery of key outcomes for the program delivered via agile and/or waterfall methodologies. They will work closely with the business/product partners, technology/business stakeholders, architecture, portfolio & core delivery teams. Supports the development of models & frameworks focused on Cybersecurity demand management, scoping & assessment of new opportunities, and delivery of strategic programs Responsible for overall delivery of a well-established capability in the program from planning to development that serves a long-term business objective Manages the assigned program including but not limited to managing established and mature products, teams, capability or category or technology solution implementation or migration Creates overall timeline, stakeholder analysis, communication plan, cross-functional dependencies, reporting structure to track progress across multiple workstreams with guidance from Sr.
