Remote Hybrid Research Registered Nurse (RN)

Job Location

United States
Remote work from: USA

Base Salary

USD 40 - USD 50

Employment Type

Full-time, Part-time

Description

Join our esteemed organization as a Hybrid Research RN, where you will be instrumental in delivering top-tier medical care and ensuring the integrity of healthcare services. This remote position is perfect for dedicated professionals who are eager to make a significant impact in the healthcare sector.

Key Responsibilities

- Evaluate and assess the medical necessity, quality, and appropriateness of care provided under the Medical Assistance Program.
- Ensure that recipients of medical assistance receive adequate care while adhering to program compliance standards.
- Review and analyze medical records and documentation to provide informed medical judgments.
- Identify and address instances of fraud and abuse within the provider or recipient framework.

Required Skills

- Valid Registered Nurse license in Pennsylvania.
- Experience in long-term care, acute care, behavioral health, substance use, managed care, quality management/utilization review, or home care settings.
- Strong writing abilities and proficiency in basic computer skills, including Microsoft Office applications.
- Familiarity with InterQual criteria, ICD-9 CM, and current procedural terminology is advantageous.

Qualifications

- Current license to practice as a Registered Nurse in Pennsylvania.
- Relevant experience in healthcare environments preferred.

Career Growth Opportunities

This role offers a unique chance to develop your professional skills while making a real difference in patient care. Be part of a collaborative team dedicated to advancing healthcare quality and ensuring compliance with medical assistance programs.
