Senior Automation Implementation Engineer

Job Location

United States
Remote work from: USA

Base Salary

USD 40 - USD 50

Employment Type

Full-time, Part-time

Description

As a Sr Automation Implementation Engineer, your role is to specialize in design, and implementation of automation solutions that are safe and economical for material handling systems in processes across our network. You have in-depth expertise in the field of MHE automation and are dedicated to optimizing productivity, efficiency, and accuracy in material handling operations. You will communicate the vision, detailed roadmap, and technical solutions to make a compelling business case with senior executives. You will work remote and report to the Sr Manager, Automation Controls Engineering.

Who We Are

QVC empowers shoppers with knowledge and shares insights in a lively and engaging way. We offer an ever-changing collection of familiar brands and fresh new products and we connect shoppers to interesting personalities, engaging stories and award-winning customer service. QVC reaches more than 200 million homes worldwide and reaches millions more by multiple streaming services, websites, mobile apps and social pages.

Your Impact

- Develop automation prototype design solutions tailored to the needs of each project.
- Work with equipment vendors, suppliers, and team members to procure and integrate the necessary MHE equipment into the automation system.
- Collaborate with Operations, Engineering, Maintenance, and site leaders to understand their specific requirements and goals for the material handling automation project.
- Conduct a detailed analysis of existing processes and workflows to identify areas for automation and improvement.
- Analyze material handling processes and workflows to identify opportunities for optimization.
- Apply optimization techniques, such as algorithms, routing, and scheduling methodologies, to minimize bottlenecks, reduce errors, and enhance operational effectiveness.
- Ensure testing and debugging of the material handling automation system to ensure functionality, performance, and safety.
