Senior Lead Site Reliability Engineer

Job Location

United States
Remote work from: USA

Base Salary

USD 40 - USD 50

Employment Type

Full-time, Part-time

Description

This role is in McLean, VA (Position allows full remote work from anywhere in the U.S.)

Salary:

\$142,000.00 – \$162,000.00 per year

What will I be doing?

Build and support CI/CD pipelines and the production releases. Solve sophisticated performance and scaling issues, working with engineers to ensure that we avoid bottlenecks and meet traffic demands through organic growth and marketing events. Develop and maintain release architectures and monitor frameworks to support the product team and enhance process flows for delivery. Provide system design consulting and other critical support to the development team prior to program launch. Supervise direct reports. 25% domestic travel.

Requirements:

Bachelor's degree in Industrial Management, Engineering, Systems Engineering, or a closely related field and three (3) years of experience in reliability engineering or related field.

Must have experience with Kubernetes/EKS; pod life cycle experience such as readiness checks/liveness checks; using Docker and working with BASH shell scripting; utilizing Dynatrace APM and RUM, Datadog, and logging analysis with Splunk; and pipeline creation, troubleshooting, and configuration of Gitlab CI.
