Software Development Engineer, Amazon

Job Location

United States
Remote work from: USA

Base Salary

USD 40 - USD 50

Employment Type

Full-time, Part-time

Description

Calling all inventors!

Amazon is investing heavily in building a world class advertising business and developing a collection of self-service performance advertising products that drive discovery and sales. Our products are strategically important to our Retail and Marketplace businesses for driving long-term growth. We deliver billions of ad impressions and millions of clicks daily and are breaking fresh ground to create world-class products. We are highly motivated, collaborative and fun-loving with an entrepreneurial spirit and bias for action. With a broad mandate to experiment and innovate, we are growing at an unprecedented rate with a seemingly endless range of new opportunities.

Sponsored Products Core Supply Infrastructure team is looking for a Software Development Engineer to build large scale, distributed systems that will bridge the gap between advertiser demand and publisher supply on Amazon. We are developing a first of its kind platform that will allow advertising programs across Amazon to provide our customers with a coherent and holistic product discovery experience across organic and sponsored selection.

If you are looking to make an impact, this is the team for you. You will not only have the satisfaction of seeing your work directly on the Amazon website where it will be viewed by tens of millions of customers and drive quantifiable revenue impact, but will also have the opportunity to help shape our engineering and product roadmaps. We are not bound by legacy systems and have a broad mandate to experiment, which gives us great flexibility as we design and develop our services. You will have an opportunity to contribute across the full stack, growing and broadening your technical skills as you work in an environment that thrives on creativity, experimentation, and product innovation.

Basic Qualifications

- 3+ years of non-internship professional software development experience
- 2+ years of non-internship design or architecture (design patterns, reliability and scaling) of new and existing systems experience
- Experience programming with at least one software programming language

Preferred Qualifications

- 3+ years of full software development life cycle, including coding standards, code

Hiring organization

Amazon
