Description
Position Overview

At PNC, our people are our greatest differentiator and competitive advantage in the markets we serve. We are all united in delivering the best experience for our customers. We work together each day to foster an inclusive workplace culture where all of our employees feel respected, valued and have an opportunity to contribute to the company's success. As a Security Engineer, within PNC's Fraud Technologies MIS Group, you may be based in a remote location. This is a remote position. Work may be performed from a quiet, confidential space in a home location, approved by PNC. This position may not be available in all geographic locations.

Must be able to execute customized/enhancement code in the Actimize IFM, RCM, AIS product and deploy them to a production environment.

In this role, you will be supporting Cyber Security Fraud across the PNC organization. Candidates must be proactive, assertive, and consistent in their learning. This is a fast paced and everchanging environment where individuals will be responsible for working on multiple initiatives across the organization.

Ideal candidates will have a a strong understanding of basic programming languages and some background in cyber security is preferred. Great opportunity for someone who likes keeping up with changing technologies and is devoted to constant personal and professional development.

The ideal candidate will have the following qualifications:
• Actimize IFM-x 10.1
• Actimize AIS 4.32, 4.34
• Actimize RCM 4.15
• Oracle 19c
• Linux RHEL 8.X
• Apache 8, 9.x
• Oracle 19
• Java
• SQL
• Agile
